DPW Report – November 2, 2026

General

- We are starting to transition over from summer maintenance and winterize our equipment.
- We have hopefully mowed and weed whacked Parks & Cemetery for the last time this year.
- We are starting to ditch the Lower Cemetery for extra drainage.
- We put new flags up in the Cemetery.
- We installed the antique lighting fixture on the corner of Main Street and River Street; Aaron's is going to troubleshoot the electricity.
- We participated in the Fall Festival Parade and picked up garbage throughout the afternoon.
- We installed a stop sign at the intersection of Dexter Avenue and Baker Avenue; we also installed another one near the old Bus Garage at the school's request.
- We submitted our road paving receipts for CHIPS reimbursement.
- We have been working on leaf removal on Main Streets and in the Parks.
- We would like to trim back the trees on Main Street in the coming months.
- The replacement of sidewalk in front of 338 Main Street was delayed until next year due to concrete supply issues associated with the construction of the new Amazon Warehouse in Schoharie.

Water

- AquaLogics came out last week and they are going to provide us with an estimate on the SCADA system.
- AquaLogics replaced the transducer that was struck by lightning, but it needs to be recalibrated.
- We patched the water line break on Upper Main Street, and we are looking to fix the sidewalk, too.
- We completed Water & Sewer meter readings for the November quarterly billing cycle.

Sewer

- We have continued to receive pump station call outs on Danforth Avenue. Otherwise, all is quiet at the Wastewater Plant.
